01 OVERVIEW

Executive Summary

MRTC Research and Tasking Solutions is a Malawian multidisciplinary research, evaluation, data and capacity-development consultancy. We generate high-quality evidence, conduct rigorous research and evaluations, manage fieldwork, analyse data and convert evidence into actionable decisions.

Established in 2019 and headquartered in Blantyre, MRTC supports organizations working to improve programmes, institutions and communities. We serve UN agencies, international and local NGOs, bilateral and multilateral donors, government ministries, foundations, research institutions, universities and private-sector organizations across Malawi — with the capacity to mobilize expertise beyond Malawi according to assignment requirements.

IN 30 SECONDS

MRTC is a Malawian multidisciplinary research, evaluation, data and capacity-development consultancy with the technical leadership, statistical expertise, health and development knowledge, field capacity, digital research capability, quality assurance systems and financial controls required to deliver credible evidence for development, humanitarian, health, agricultural, education, livelihood and private-sector programmes.

2019	5	3	11
ESTABLISHED	CORE SERVICE PILLARS	METHODOLOGICAL STREAMS	SECTORS SERVED

What we deliver

- Baseline, midline, endline and impact evaluations
- Surveys, assessments and situation analyses
- Nationally-mobilised digital field data collection
- Statistical, econometric and qualitative analysis
- Dashboards, GIS and data visualisation
- Institutional research and capacity development

Why organisations choose MRTC

- PhD-level research leadership and a multidisciplinary team
- Deep, first-hand knowledge of Malawi's context
- Digital data collection and modern analytical systems
- Structured quality assurance and ethical safeguards
- Registered accounting expertise and financial controls
- A flexible roster assembled to each Terms of Reference

> *MRTC is positioned to compete credibly for research, evaluation, data, training and development consultancy assignments — with the technical leadership, statistical expertise, field capacity, quality systems and financial controls required to deliver evidence donors and programme managers can trust.*

02

WHO WE ARE

A Research-Led Consultancy

MRTC is a Malawi-registered consultancy built around one conviction: **decisions about programmes, policy and investment should be grounded in credible evidence.** Our identity is research and evidence generation first — supported by evaluation, data, analytics, training and development consulting.

Research & Evidence

Our dominant identity. Rigorous studies, assessments and evaluations that answer real decision-making questions.

Evaluation & Learning

A major pillar. We design and deliver evaluations that measure what matters and feed learning back into programmes.

Data & Digital

Digital field systems, analytics and visualisation that strengthen and accelerate our research capability.

Positioning

> *MRTC is a Malawian multidisciplinary research, evaluation, data and capacity-development consultancy providing evidence-driven solutions for organizations working to improve programmes, institutions and communities.*

E
EVIDENCE
Credible, methodologically sound findings.

I
INSIGHT
Interpretation that explains the "why".

C
CAPACITY
Strengthened teams and institutions.

I
IMPACT
Measurable, evidence-informed change.

Company identity

Registration & history

MRTC Research and Tasking Solutions — a Malawi-registered consultancy established in **2019**.

Geographic capability

Malawi-wide operational capacity, with the ability to mobilize expertise beyond Malawi where an assignment requires it. We do not maintain permanent offices outside Blantyre.

03 DIRECTION

Vision, Mission & Strategic Objectives

Our Vision

To be a trusted African partner for evidence-driven development — recognised for research excellence, learning and measurable impact that strengthens programmes, institutions and communities.

Our Mission

To deliver rigorous research, credible evaluations, high-quality data and advanced analytics that enable evidence-informed decisions — building the capacity of organizations to learn, adapt and achieve sustainable, inclusive development.

Strategic Objectives

- Conduct rigorous, ethically sound research that meets international standards.
- Generate reliable evidence for programme and policy decisions.
- Deliver high-quality baseline, midline, endline and impact evaluations.
- Strengthen data quality and analytical capacity across our work.
- Provide innovative digital research and data solutions.
- Build research and organizational capacity in the institutions we serve.
- Support organizations to learn and adapt using evidence.
- Contribute to sustainable and inclusive development outcomes.

Core Values

Integrity
Honesty, transparency and professional accountability.

Research Excellence
Methodological rigour and credible evidence.

Independence & Objectivity
Impartial analysis and evidence-based conclusions.

Ethics & Safeguarding
Protecting participants; responsible research practice.

Innovation
Appropriate technology and modern analytical approaches.

Inclusion
Gender, disability, vulnerability and social diversity.

Accountability
Responsibility for the quality and reliability of our work.

Learning
Converting evidence into programme improvement.

04 APPROACH

Research Philosophy & Service Architecture

Our work is guided by a simple philosophy: **rigour in method, integrity in practice, and utility in output.** Every study we undertake is designed to answer a question someone actually needs answered — and to produce evidence that can be acted upon.

Rigour

Sound design, defensible sampling and disciplined analysis — the foundation of credibility.

Context

Malawi-specific understanding of language, culture, geography and institutional realities.

Utility

Findings translated into clear recommendations, briefs and dashboards decision-makers can use.

Five Core Service Pillars

PILLAR 01 Research & Assessments › **PILLAR 02** Monitoring, Evaluation & Learning › **PILLAR 03** Data Collection & Field Research › **PILLAR 04** Data Analytics & Visualisation › **PILLAR 05** Training & Capacity Development

How the pillars work together

An assignment often spans several pillars: a baseline study (Pillar 1) built on a field data collection exercise (Pillar 3), analysed and visualised (Pillar 4), feeding a results framework and evaluation design (Pillar 2), delivered alongside staff training (Pillar 5).

Academic & institutional research

MRTC also provides research-methodology support, statistical analysis, research training and dissertation/thesis methodology assistance for institutions and researchers. This is a supporting service — not our primary identity.

05

PILLAR 01

Research & Assessments

We design and deliver studies that establish baselines, understand needs, size markets, assess feasibility and generate the evidence programmes and policies are built on.

Formative & Design Research

- Baseline, midline and endline studies
- Needs assessments
- Situation analyses
- Feasibility studies

Market & Sector Research

- Market assessments and market research
- Consumer, producer and trader studies
- Value-chain and market-systems analysis
- Private-sector and institutional research

Applied & Thematic Research

- KAP studies
- Household, community and facility assessments
- Policy, operational and behavioural research
- Health, agriculture, education and livelihoods research

Assessment types we routinely deliver

- Household & community surveys
- Gender and social inclusion research
- Humanitarian and livelihood assessments
- Facility & institutional assessments
- Post-distribution monitoring
- Special-purpose diagnostic studies

> *Every study is scoped against the Terms of Reference, with methodology, sampling, tools and protocols designed before any field activity begins.*

06

PILLAR 02

Monitoring, Evaluation & Learning

We help organizations understand whether their programmes work, why, and how they can improve. Our evaluation practice is built on internationally recognised approaches and standards.

Evaluation design & delivery

- Baseline, midline and endline evaluation
- Impact and outcome evaluation
- Process and programme evaluation
- Performance assessment and programme reviews

MEAL systems

- Theory of Change and results frameworks
- Logframes and indicator development
- MEAL system design and data-quality assurance
- Accountability, feedback and learning mechanisms

Learning methods

- Learning studies and after-action reviews
- Outcome harvesting and contribution analysis (where appropriate)
- Evaluation synthesis and meta-review

Standards we draw on

- OECD-DAC evaluation criteria
- Theory of Change
- Results-Based Management
- Logical Framework Approach
- Mixed-methods evaluation

We apply these internationally recognised approaches as professional practice. MRTC does not claim third-party accreditation for evaluation services.

07 PILLAR 03

Data Collection & Field Research

MRTC maintains real field implementation capacity. We recruit, train, deploy and supervise enumerator teams nationwide — with structured quality controls at every stage of data collection.

Field methods

- Household, facility and community surveys
- Key informant interviews (KIIs)
- Focus group discussions (FGDs)
- In-depth interviews (IDIs) and observation

Field operations

- Enumerator recruitment and training
- Field supervision and community mobilisation
- Community entry and engagement
- Field logistics and coordination

Data-quality controls

- Digital data collection with validation rules
- Back-checks and spot checks
- Data verification and cleaning
- Supervisor review and sign-off

Digital research ecosystem

KoboToolbox Mobile surveys	**ODK** Open Data Kit	**SurveyCTO** Advanced forms	**Excel** Data management	**SPSS** Statistical analysis
Stata Econometrics	**Power BI** Dashboards	**QGIS** Spatial analysis	**PostgreSQL** Databases	

These are tools and capabilities used across our work — not third-party certifications.

> *Field capacity is a core MRTC differentiator: a national field model of enumerators, supervisors and community-engagement staff, coordinated from Blantyre and deployed to any district.*

08

PILLAR 04

Data Analytics & Visualisation

Data is only as valuable as the insight it produces. MRTC turns raw data into clean, analysable datasets — and clean data into findings, dashboards and decisions.

RAW DATA Collected in the field → **CLEAN DATA** Validated & structured → **ANALYSIS** Statistical & thematic → **VISUALISATION** Dashboards & charts → **INSIGHT** Interpretation → **DECISION** Actionable evidence

Quantitative analysis

- Data cleaning, validation and management
- Descriptive and inferential statistics
- Regression and econometric analysis
- Survey analysis and quantitative modelling

Qualitative analysis

- Qualitative coding and analysis
- Thematic and content analysis
- Triangulation of mixed sources
- Narrative synthesis

Visualisation & spatial

- Data visualisation and dashboards
- GIS and spatial analysis (QGIS)
- Automated and reproducible reporting
- Research databases

> *Our analytics capability is led by specialists in statistics, econometrics and research methodology — including PhD-level leadership in advanced quantitative methods such as structural equation modelling.*

09

PILLAR 05

Training & Capacity Development

MRTC builds institutional capability, not just deliverables. Our training portfolio strengthens the research, data and evaluation skills of the organizations we work with.

Research

- Research methodology & design
- Sampling & questionnaire design
- Data collection practice
- Research ethics

Data

- KoboToolbox · ODK · SurveyCTO
- Excel & data management
- SPSS · Stata
- Power BI & data visualisation

MEAL

- Monitoring & evaluation
- MEAL frameworks & indicators
- Results frameworks
- Data-quality & evaluation practice

Professional Development

- Project management
- Report writing
- Proposal & grant writing
- Strategic planning & RBM

Delivery formats

Face-to-face
On-site workshops

Online
Virtual training

Hybrid
Blended delivery

Organizational
Tailored to staff needs

Field Teams
Enumerator & supervisor training

Training is positioned as professional institutional capacity development — supporting organizations and their teams — rather than individual academic tutoring.

10

SECTORS

Sector Expertise

- Health
- Humanitarian Response
- Agriculture
- Gender & Social Inclusion
- Market Systems
- Digital Transformation & Data
- Sexual & Reproductive Health
- Livelihoods & Development
- Education
- Governance & Social Development
- Private Sector

Our multidisciplinary team combines direct sector experience with specialist expertise that can be mobilized according to the requirements of each assignment. Depth of experience varies by sector — we deploy specialists matched to the work, rather than claiming equal depth everywhere.

11

HOW WE WORK

The MRTC Research Lifecycle

Every assignment follows a disciplined, nine-stage lifecycle — from discovery to learning — with quality checks embedded at each transition.

01 **Discover**
Context analysis · research questions · literature review · stakeholder engagement.

02 **Design**
Methodology · sampling strategy · tools · protocols and ethical approvals.

03 **Prepare**
Enumerator recruitment · training · piloting · field planning and logistics.

04 **Collect**
Digital surveys · KIIs · FGDs · observations — with live data monitoring.

05 **Assure**
Back-checks · spot checks · validation · cleaning.

06 **Analyse**
Statistics · qualitative analysis · GIS · modelling.

07 **Interpret**
Triangulation · synthesis of findings · insight generation.

08 **Communicate**
Reports · dashboards · policy briefs · presentations.

09 **Learn**
Recommendations · adaptation · programme improvement and follow-up.

12

METHODS

Methodological Capability

Quantitative

- Survey design & probability sampling
- Descriptive & inferential statistics
- Regression & econometric analysis
- Statistical modelling & impact analysis

Qualitative

- Key informant interviews
- Focus group discussions
- In-depth interviews & case studies
- Thematic & content analysis

Mixed Methods

- Integrated quantitative–qualitative design
- Triangulation across sources
- Sequential & convergent designs
- Contextual interpretation of results

Quantitative Evidence
What is happening, and to what extent

+

Qualitative Explanation
Why it is happening

+

Contextual Interpretation
What it means in this setting

=

Actionable Evidence
Decisions you can act on

We select and combine methods according to the research question — never applying a one-size-fits-all approach. The mixed-methods formula above is central to how we convert measurement into meaning.

13

QUALITY

Quality Assurance Framework

Quality is engineered, not hoped for. A structured twelve-point framework governs every deliverable from design to client validation.

01 **Research Design Review**
Methodology and sampling approved against the Terms of Reference.

02 **Tool Review**
Questionnaires and guides reviewed for validity, clarity and alignment.

03 **Pilot Testing**
Instruments tested and refined before full deployment.

04 **Enumerator Training**
Standardised training, certification and role-play before fieldwork.

05 **Field Supervision**
Continuous supervision and real-time submission monitoring.

06 **Back-checks & Spot Checks**
Independent verification of a defined proportion of interviews.

07 **Data Validation**
Range, logic and consistency checks on submitted data.

08 **Data Cleaning**
Outlier review, deduplication and variable harmonisation.

09 **Technical Analysis Review**
Analytical code and outputs checked by a second specialist.

10 **Peer / Technical Review**
Independent review of findings and interpretation.

11 **Final Quality Control**
Editorial, formatting and consistency sign-off before release.

12 **Client Validation**
Findings presented and validated with the client and stakeholders.

14

RESPONSIBILITY

Ethics, Safeguarding & Responsible Research

Responsible research is non-negotiable. Our practice protects participants, upholds consent and confidentiality, and safeguards vulnerable people throughout the research process.

Participant protection

- Informed consent
- Confidentiality & participant privacy
- Do-no-harm principle
- Child safeguarding

Inclusive practice

- Gender-sensitive research
- Inclusive research design
- Protection of vulnerable participants
- Respectful community entry

Conduct & integrity

- Researcher & enumerator ethics
- Conflict-of-interest management
- Complaints & feedback mechanisms
- Professional standards of conduct

Secure data handling

- Secure data handling & storage
- Safe data transfer
- Access control and need-to-know access

MRTC applies robust ethical and safeguarding practice as a matter of professional responsibility. We do not claim third-party certifications we do not hold.

15

GOVERNANCE

Data Protection & Financial Management

Data protection & governance lifecycle

COLLECT Purpose-specific data → **PROTECT** Access control & secure storage → **VERIFY** Data quality checks → **ANALYSE** Controlled workflows → **REPORT** Anonymised outputs → **RETAIN / DISPOSE** Responsible retention

- Purpose-specific data collection
- Access control on a need-to-know basis
- Secure storage and safe transfer
- Data-quality assurance throughout analysis
- Appropriate anonymisation of outputs
- Responsible retention and disposal

Our practices are aligned with Malawi data protection principles. MRTC does not make unsupported claims of statutory compliance or certification.

Financial management & compliance

BUDGET Assignment budgeting → **AUTHORIZATION** Approval controls → **EXPENDITURE** Tracked spending → **DOCUMENTATION** Receipts & records → **RECONCILIATION** Account matching → **REPORTING** Financial reporting

> *MRTC maintains access to registered accounting expertise to support financial controls, budget administration, documentation, reconciliation and compliance requirements — including assignment-level financial tracking, procurement controls and audit readiness.*

MRTC does not publish the accountant's name, registration number, professional body or qualifications in this profile; these are available upon request.

CORPORATE SUPPORT
Registered Accountant
Finance, Compliance & Financial Controls

▼

TECHNICAL ROSTER

Research Associates · Data Analysts · Qualitative Researchers · Enumerators · Field Supervisors · Trainers · GIS Specialists · Additional subject-matter experts

MRTC uses a flexible multidisciplinary team model, assembling the most appropriate technical specialists according to the Terms of Reference, methodology and sector requirements of each assignment.

17

SENIOR TECHNICAL TEAM

Leadership Profiles

OWNER CONSULTANT

Francis Fweta

Lead – Research, MEAL & Development Programmes

ACADEMIC BACKGROUND

Master's in Information Systems · Bachelor's in Development Studies / Agribusiness · Bachelor's in Social Sciences

EXPERTISE

Research · MEAL · Development Programmes · Humanitarian Programming · Agriculture · Livelihoods · Data Systems · Digital Data Collection · Project Management · Consultancy Management · Training

ROLE AT MRTC

Leads research, MEAL and development-programme assignments as a co-owner consultant; coordinates technical delivery and client relationships alongside fellow senior consultants.

DIRECTOR OF RESEARCH, TECHNICAL STRATEGY & ADVANCED ANALYTICS

Dr. Dennis Francisco Chandiona, PhD

Senior Research & Technical Authority

ACADEMIC BACKGROUND

PhD in Business Science (Marketing Studies), University of Cape Town — **completed and conferred, 2026** · Senior Lecturer & Head of Department of Business Administration, Exploits University

EXPERTISE

Research Methodology · Marketing Research · Consumer Behaviour · Strategic Marketing · Relationship Management · E-Commerce · Structural Equation Modelling (PLS-SEM) · Advanced Analytics · Academic Research · Research Publications

ROLE AT MRTC

Provides PhD-level leadership for research design, advanced quantitative research, market and consumer research, technical quality assurance and analytical strategy across assignments.

> *Dr. Chandiona's completed doctoral research and academic leadership materially strengthen MRTC's research design, advanced analytics and technical credibility.*

18

SENIOR TECHNICAL TEAM

Leadership Profiles

SENIOR LEAD – QUANTITATIVE RESEARCH, STATISTICS & ECONOMICS

Percival Mwale

PhD Candidate (Economics)

ACADEMIC BACKGROUND

Master's in Health and Applied Statistics · Bachelor's in Economics, University of Malawi · Currently pursuing a PhD in Economics

EXPERTISE

Statistics · Health Statistics · Economics · Econometrics · Quantitative Research · Statistical Modelling · Survey Analysis · Impact Analysis · Evaluation · Data Quality Assurance

ROLE AT MRTC

Leads quantitative research, statistical and econometric analysis; assures data quality and analytical rigour across surveys and evaluations.

LEAD – HEALTH, SOCIAL RESEARCH & CAPACITY DEVELOPMENT

Malumbo Kumwenda

Health & Social Research Specialist

ACADEMIC BACKGROUND

Master's in Social Sciences · Bachelor's in Community Development · Bachelor's in Health Sciences (United States)

EXPERTISE

Health Research · Social Research · Health Programme Assessments · Community Research · Field Research · Mixed-Methods Research · Training · Capacity Development

ROLE AT MRTC

Leads health and social research, community-level studies and capacity-development initiatives; supports mixed-methods design and delivery.

FIELD OPERATIONS & COMMUNITY ENGAGEMENT COORDINATOR

Richard Jingo

Field & Community Implementation

OPERATIONAL VALUE

Field Coordination · Community Engagement · Community Mobilisation · Enumerator Coordination · Field Logistics · Participant Engagement · Field Supervision · Data Collection Support · Community Entry · Field Quality Monitoring

ROLE AT MRTC

Coordinates field operations and community engagement — demonstrating that MRTC has real, practical field implementation capacity, not only technical expertise.

FINANCE, COMPLIANCE & FINANCIAL CONTROLS

Registered Accountant

Corporate Support

INSTITUTIONAL VALUE

Budget Control · Financial Documentation · Reconciliation · Financial Reporting · Compliance · Accountability · Procurement Documentation · Audit Readiness

ROLE AT MRTC

Provides registered accounting expertise supporting MRTC's professional management of consultancy funds and financial accountability.

Name, registration number, professional body and qualifications available upon request.

19

TEAM STRATEGY

TOR-Specific Team Deployment

We do not deploy the same team for every assignment. From the MRTC Technical Roster, specialists are selected to match each Terms of Reference — giving us scalability and sector-appropriate depth.

ASSIGNMENT TYPE	LEAD CONFIGURATION
Health / SRHR research	Francis Fweta · Malumbo Kumwenda · Percival Mwale · relevant field specialist
Market research	Dr. Dennis Chandiona · Francis Fweta · Percival Mwale
Economic research	Percival Mwale · Francis Fweta · Dr. Dennis Chandiona
MEAL / development evaluation	Francis Fweta · Percival Mwale · Malumbo Kumwenda / sector specialist
Agriculture / livelihoods	Francis Fweta · Percival Mwale · relevant agricultural specialist
Large-scale field data collection	Francis Fweta · Richard Jingo · technical specialist · field supervisors & enumerators

> *This model demonstrates team scalability and TOR-specific deployment — a critical feature for competitive consultancy bids.*

Core four for donor-facing technical credibility

Dr. Dennis F. Chandiona, PhD
Director of Research, Technical Strategy & Advanced Analytics

Francis Fweta
Owner Consultant · Lead – Research, MEAL & Development

Percival Mwale
Senior Lead – Quantitative Research, Statistics & Economics · PhD Candidate

Malumbo Kumwenda
Lead – Health, Social Research & Capacity Development

Supported by Richard Jingo (Field Operations & Community Engagement) and a Registered Accountant (Finance, Compliance & Financial Controls) — a balanced structure of research leadership, management, statistics, health, field operations and finance.

20

TRACK RECORD

Selected Experience

MRTC distinguishes clearly between work delivered directly by the organization and experience held within the team's professional backgrounds. This distinction is fundamental to our credibility.

MRTC organizational experience

Assignments contracted and delivered directly by MRTC Research and Tasking Solutions. Specific clients and projects are presented only where directly supported — full details and references available upon request.

Selected professional / team experience

Work our senior team members have delivered through prior roles and engagements. This is team experience, and is presented as such — not as direct MRTC contracts.

Organizations associated with team experience

SELF HELP AFRICA · DAPP MALAWI · FISD · WFP-SUPPORTED PROGRAMMES · USAID-SUPPORTED PROGRAMMES · ECHO-SUPPORTED PROGRAMMES · PEPFAR-SUPPORTED PROGRAMMES · CADECOM

These associations reflect the breadth of our team's professional background across humanitarian, health, livelihoods, education and agricultural programming. They are not presented as direct MRTC contracts.

Study categories we deliver

- Baseline studies
- Midline studies
- Endline studies
- Market assessments
- Humanitarian assessments
- Health research
- Agricultural research
- Livelihood studies
- Data collection exercises
- MEAL assignments
- Training & capacity building
- Academic & institutional research

For each verified assignment, MRTC can provide: Project · Client · Sector · Geographic area · Assignment type · Year · Key contribution — available upon request.

21

PORTFOLIO

Representative Assignment Portfolio

Structured portfolio cards show how each verified assignment is documented. Specific clients, locations, years and contributions are provided in proposals and on request — MRTC does not publish unverified project details.

Baseline Study

Verified detail on request

Assignment	Baseline study for programme design
Client	Available upon request
Sector	Development / livelihoods
Area	Malawi (regional)
Contribution	Design, sampling, digital data collection, analysis, reporting

Endline Evaluation

Verified detail on request

Assignment	Endline evaluation of a programme cycle
Client	Available upon request
Sector	Health / humanitarian
Area	Malawi (multi-district)
Contribution	Evaluation design, OECD-DAC criteria, mixed-methods analysis

Market Assessment

Verified detail on request

Assignment	Market & value-chain assessment
Client	Available upon request
Sector	Agriculture / market systems
Area	Malawi (target districts)
Contribution	Consumer & trader research, channel analysis, opportunity mapping

Humanitarian Assessment

Verified detail on request

Assignment	Needs / post-distribution assessment
Client	Available upon request
Sector	Humanitarian response
Area	Malawi (affected areas)
Contribution	Rapid assessment, field data collection, PDMs, reporting

MEAL Assignment

Verified detail on request

Assignment	Results framework & indicator development
Client	Available upon request
Sector	Cross-sectoral
Area	Malawi (national)
Contribution	MEAL system design, data-quality assurance, capacity building

Data Collection Exercise

Verified detail on request

Assignment	Large-scale digital household survey
Client	Available upon request
Sector	Health / education
Area	Malawi (national field teams)
Contribution	Enumerator training, supervision, digital data collection, QA

24

WHY MRTC

Competitive Advantages

1 · Multidisciplinary expertise

Research, statistics, economics, health and development, data and digital — under one roof.

2 · Local knowledge

Deep, first-hand understanding of Malawi's context, culture and institutions.

3 · Research-to-decision capability

We convert evidence into actionable recommendations, not just reports.

4 · Digital research capability

Modern digital data collection and analytical systems across the research lifecycle.

5 · Strong technical leadership

PhD-level research expertise alongside multidisciplinary specialists.

6 · Field capacity

Real community engagement and field coordination — nationwide deployment.

7 · Quality assurance

Structured technical and field-level quality control across every deliverable.

8 · Ethical & responsible research

Safeguarding, confidentiality and participant protection as standard practice.

Client engagement journey

Client Need — Requirement identified

› **Technical Discussion** — Scoping & clarification

› **Proposal & Methodology** — Design & budget

› **Field Preparation** — Tools · training · pilot

› **Data Collection** — Nationwide fieldwork

› **Quality Assurance** — Checks & validation

› **Analysis** — Statistics · synthesis

› **Reporting** — Reports & dashboards

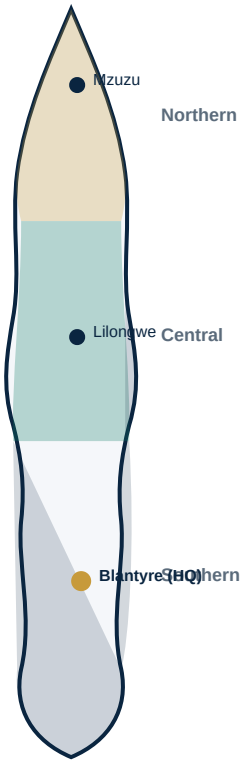

› **Presentation & Dissemination** — Client engagement

› **Learning & Follow-up** — Adaptation support

25

COVERAGE

Geographic Reach

National field mobilisation

MRTC is headquartered in Blantyre (Southern Region) and mobilises field teams nationally across the Northern, Central and Southern regions according to assignment requirements. We do not maintain permanent offices outside Blantyre.

Field deployment model

- Central coordination from Blantyre
- Regional and district enumerator teams
- Field supervisors embedded at collection points
- Community engagement and entry support
- Real-time digital data monitoring nationwide

Map is illustrative of Malawi's three administrative regions; markers show Blantyre (headquarters) and indicative coordination points.

26

ALIGNMENT

Website Alignment & Donor Readiness

MRTC's brand, website and proposals are aligned to a single research-led message. The tables below summarise recommended alignment across channels and how MRTC capabilities map to donor and client needs.

Website alignment recommendations

This profile is designed to align with, and direct readers toward, the MRTC website for additional information. Recommended alignment across Website ↔ Profile ↔ Proposals ↔ Capability Statements ↔ Branding ensures one consistent, research-led message.

CHANNEL	CURRENT POSITIONING	RECOMMENDED ALIGNMENT
Website	Emphasises tasking, students and generic business support	Reposition hero and navigation around Research · Evaluation · Data · Training · Development
This profile	—	Research-led capability statement; the anchor document for all outreach
Proposals	—	Mirror the five pillars, lifecycle, QA framework and TOR-specific team model
Capability statements	—	Condensed 1–2 page versions derived from this profile per sector/opportunity
Branding	Varies	Unify around Evidence · Insight · Capacity · Impact and consistent colours/typography

Donor readiness at a glance

DONOR / CLIENT NEED	HOW MRTC RESPONDS
Evidence for programme & policy decisions	Rigorous research, assessments and evaluations (OECD-DAC, ToC, mixed methods)
Reliable field data at scale	National enumerator model with digital tools and structured QA (back-checks, validation)
Statistical & econometric credibility	Dedicated quantitative leadership (statistics, econometrics, impact analysis)
Health & social research depth	Health-sciences-led research and capacity development
Safeguarding & responsible research	Consent, confidentiality, do-no-harm, child safeguarding, secure data handling
Financial accountability & compliance	Registered accounting expertise, documented controls, audit readiness
Value for money & adaptability	TOR-specific team deployment from a flexible technical roster

27 COLLABORATION

Partnerships & Contact

Partnerships & collaboration

MRTC distinguishes clearly between the kinds of relationships it holds. We use the term "partner" only where a genuine partnership exists.

Previous clients

Organizations MRTC has directly served — disclosed with supporting detail on request.

Team experience associations

Organizations associated with our team's professional backgrounds, as noted in this profile.

Collaborating institutions

Institutions we work with on specific assignments (e.g. academic and research institutions).

Strategic & potential partners

Where a formal partnership exists or is being developed, it is stated as such — otherwise "potential".

> *We welcome the opportunity to discuss how MRTC can support your next research, evaluation, data or capacity-development assignment. A detailed technical proposal, references and team CVs are available upon request.*
